**Operations Manual**  
**Wyandotte County / Kansas City, KS R.A.C.E.S**  
**Chapter 1.1 SPOTTER LOCATIONS**

The spotter location information listed in this chapter was taken in the spring of 2005 and should be used as a reference only. Weather, season, time of day and other factors may change the condition of the location. The spotter should review the safety of the location upon arrival. Report any major changes at the location to the Emergency Management Department.

When possible, use the INDEX indicator when reporting your spotter location.

Members are not limited to these locations. When spotting at a location not listed, inform Net Control of the location.
